

HMI Assignment 5.1

Name: Arnav Vivek

Roll no.: B24CS1014

User Persona 1

Name: Aanya Sharma

Age: 21

Occupation: Undergraduate College Student

Nationality: Indian

About Aanya:

Aanya is a fashion-conscious college student living in a hostel. She enjoys staying updated with the latest trends and frequently shops online for clothes, accessories, and beauty products. She uses her smartphone for almost everything, from social media to payments and food ordering.

Technology Proficiency:

Highly proficient with smartphones and apps. Comfortable using digital payments, tracking orders, and comparing products online.

Interests:

Fashion, Instagram trends, skincare, college events, online deals.

Shopping Habits:

- Shops mostly during sales or when discount notifications appear.
- Compares multiple products before purchasing.
- Reads reviews before making decisions.
- Prefers cashless payments (UPI, wallets).

Needs:

- Easy discovery of trending fashion items.
- Quick checkout process.
- Clear product reviews and ratings.
- Real-time order tracking.

Frustrations:

- Complicated checkout process.
- Hidden delivery charges at the last step.
- Delayed delivery updates.
- Poor return experience.

User Scenarios for Aanya

➤ Scenario 1 (Discovery to Purchase):

Aanya is scrolling through Instagram when she sees a friend wearing a trendy oversized jacket. She wants something similar for an upcoming college fest. She opens the shopping app and searches for “oversized denim jackets.”

She applies filters for price range, color, and size. After comparing ratings and reading reviews, she finds one with 4.5 stars and good customer photos. She adds it to her cart.

At checkout, she uses a student discount coupon and pays via UPI. She receives an instant confirmation notification and tracks the order through the app until delivery.

Her goal: To quickly find a trendy, affordable outfit for a college event without wasting time.

➤ Scenario 2 (Post-Purchase & Return Experience):

After receiving the jacket, Aanya realizes the size is slightly loose. She opens the app and navigates to “My Orders.” She selects “Return/Exchange” and chooses a smaller size.

The app provides a simple step-by-step process and shows pickup availability for the next day. She schedules a pickup and receives confirmation notifications.

The replacement arrives within a few days, and she feels satisfied with the smooth return process.

Her goal: To exchange a product easily without stress or confusion.

User Persona 2

Name: Rohan Mehta

Age: 35

Occupation: Working Professional (IT Manager)

Nationality: Indian

About Rohan:

Rohan is a busy IT manager living in a metropolitan city. He works long hours and prefers shopping online to save time. He mainly shops for household essentials, electronics, and occasional gifts for family.

Technology Proficiency:

Moderately to highly proficient. Comfortable with apps but prefers simple, efficient interfaces.

Interests:

Technology gadgets, productivity tools, fitness, family time.

Shopping Habits:

- Makes planned purchases rather than impulse buys.
- Prefers trusted brands.
- Values fast delivery options.
- Frequently checks delivery timelines before ordering.

Needs:

- Fast search functionality.
- Reliable product information.
- Secure payment options.
- On-time delivery.

Frustrations:

- Out-of-stock products.
- Late deliveries.
- Complicated navigation.
- Too many irrelevant product suggestions.

User Scenarios for Rohan

Scenario 1 (Urgent Purchase):

Rohan realizes his phone charger has stopped working the night before an important office trip. He opens the shopping app and searches for “fast charging adapter.”

He filters results by “4+ star rating” and “Next-Day Delivery.” He quickly compares two trusted brands and checks user reviews.

After confirming delivery by tomorrow evening, he places the order using his saved credit card. He receives order confirmation and delivery tracking updates.

The charger arrives on time, helping him avoid inconvenience during travel.

His goal: To quickly purchase a reliable product with guaranteed fast delivery.

Scenario 2 (Planned Household Purchase):

Rohan and his wife decide to buy a new microwave oven. He uses the shopping app to compare models, prices, features, and warranty information.

He reads detailed specifications and customer reviews. He also checks EMI options available in the app. After careful comparison, he adds the selected product to the cart.

Before checkout, he verifies return policies and delivery timelines. He completes the purchase and schedules delivery on a weekend when he will be home.

After delivery, he receives installation support information within the app.

His goal: To make an informed, secure purchase for a high-value household item.
